

Internet of Things @ UL

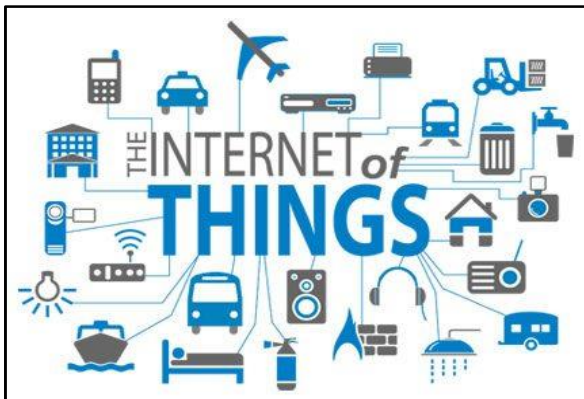

Marconi One Day Seminar

Department of Electronic & Computer Engineering
University of Limerick
July 25th, 2019

This event will feature Scientific and Professional lectures from industry leaders with discussions related to Smart technologies focussed around the Internet of Things. Topics will include Autonomous Vehicles, Smart Cities, Sensors, Artificial Intelligence, Data Security and Ethics. New technologies in the area will be outlined in a manner that is relevant to industry & Academia as well as the general public. There will also be a chance to network with all of the participants and contributors over coffee making this a very worthwhile event to attend.

Venue: Analog Devices Building, University of Limerick
